- Work in **Java** includes: Java **UI - Swing** and **Netbeans** IDE UI Editor, **JVM**.
- Working with Analysis and **Statistics** Software on a huge amount of entities of 20M+ per query using **JMP** and **Midas**.
- Operating Systems: **Linux**, Win. XP, Win. Server and Win. 7
- **CVS**

PROJECTS:

2010-2012: Image and Camera

- CameraPCController - **Java** application where I used a red camera dot to control video games on my computer.
- GenieStills - particle-based graphical online greeting cards, with an animated **GUI**: Worked with Java SE and **JSP**. Used **Glassfish** and **Tomcat Server**.

2013-2016: Web and Mobile

- EffectuatedKeyboard - **Android** keyboard with on screen animation effects. Publicly reviewed.
- Worked in **Android Studio**. Learnt the basics of **Gradle**. Worked a lot with **git** online repository.
- Facebook friends plugin: wrote end-to-end facebook plugin. Used **Netbeans**, designed **JSP** page, supported the basis with **Java Servlets**. Hosted at **Google Apps Engine** for Java.

2014-2015: 3D Unity

- Wegabot - 3D Animated Humanoid Model in **Unity**, used **C#**. Full porting to **Android Touch**.

2013-2014: RDBMs and SQL

- LyricFrog - Search Engine for lyrics. Used **MySQL** as the **RDBMS**, **JDBMS** as the middleware.

2017: Facebook app design

- MagicStick - Design of my own PHP app for Facebook with *Disney* colors and childish L & F.

2018: Clock Screen Server

- Clocks - Fascinating 24" **Javascript** clock screen saver, available for web as well.

2018-2019: Online Chat app

- oink - Python backend chat app that runs on standalone nginx instance on Google's **server** and stores **messages** from users that communicate through Curses library **Perl** Script Window.

2018-2019: Running my own server

- Turned my computer into an online server, survived an attack and closed all ports and all doors.
- +various **bash** scripts for managing desktop and SQL Database.
- +various small **bootstrap** and **HTML5** websites.

EDUCATION:

2006-2014: BSc. Computer Science at The Open University of Israel. (**BSc in parallel to school**)

ARMY:

2011-2014: Head of Defensive War-Room at The Arming Forces of IDF

- **Recognised and awarded** War Room Office Operative.

COURSES AND RAMP-UP:

- Web: **Google Apps Engine**, **HTTP**, **JSP**, **Servlets**, **Perl**, **PHP**, **CSS3**, **jQuery**, **Bootstrap**, **DNS**, **MySQL Server**, **HTML5**, **NodeJS**, **telnet**, **SSH**, **LAMP Stack**, **VueJS**, **Design**, **SQL**, **Apache Server**, **SCSS**.
- Statistics and Analytics: **Excel VBA**, **JMP**, **MIDAS**, **Windows SQL Server**, **MySQL**, **Perl**, **Bash**.
- Graphics and Camera: **Unity**, **C#**, **Game Physics**.
- Shells and Terminals: **fish shell**, **bash**, **csch**, **zsh**, **iTerm**, **iTerm2**, **Darwin OS X**, **UNIX**.

To: The Hiring Manager

Hello,

I started working on my burning lust for technology as a 16 years old child at the Leo Beck school halls, when I was invited to study in parallel to school at the Open University in the Computer Science faculty. I see myself as a big fan of the Israeli HiTech Industry, striving to develop and bring on as much as I can to the Israeli HiTech using my skills. I joined Intel Corp. while I'm still a young soldier at the IDF and a graduating student at the Open University. **I am being led with the belief that making things work and changing the mindset of the people around my social cycle are the key ingredients of my skills and values.**

A spark leads to a fire.

Thank you for leading a change in the technology I use and I hope to hear from you soon!

**Regards,
Vitali Pomanitski**
